STAR

COOLING TOWERS

Star Cooling Towers offers fiberglass equipment access walkways and work platforms for permanent use. They are corrosion-resistant, slip-resistant, ultraviolet-resistant, strong, lightweight, and fire-retardant. The robust and light fiberglass panels or grating can be custom-designed for the best fit around mechanical equipment for maintenance and service. Fiberglass is light enough to handle without the heavy equipment steel grating requires. There will be no need for scaffolding and planking, saving field labor and downtime. Corrosion resistance and a gritted surface provide a durable, slip-resistant, safe walkway for distribution basins and plenum walkways. Available in solid or grated designs. Molded-in color means you skip costly recurring maintenance such as painting or coating. Contact Star Cooling Towers for custom-designed and installed fiberglass platforms, walkways, and handrails that meet OSHA requirements for your cooling tower, regardless of age or manufacturer.

Call today for more details. OEM Replacement Parts Star Cooling Towers is a complete cooling tower supply company offering a wide range of products to the cooling tower industry since 1951. Our large selection of quality OEM (Original Equipment Manufacturer) replacement parts is compatible with most models and manufacturers of cooling towers, and they offer a high-quality, reliable, low-cost alternative to expensive original equipment parts.
